

Bedrock Builders, Inc.
Building Trust as We Build Homes.

Bedrock Builders, founded in 2000 by Steve Ball and Dan Wolf, specializes in custom and semi-custom homes typically for move-up and empty-nester homeowners. Dan majored in Building Construction and Technology at Purdue University and has been building homes ever since. Together Dan and Steve, who runs the financial side of the business and sales, have more than 34 years of experience.

Since its founding, Bedrock Builders has grown from building three homes a year to an average of 25 to 40 projects per year, with homes ranging from \$250,000 to \$3M. Its homes can be found in Geist Woods Estates, Sagamore and Stonegate and have won numerous Home-A-Rama awards and the Builders Association of Greater Indianapolis' M.A.M.E awards. Most recently Bedrock Builders received the Silver Award in the \$30,000 - \$850,000 category at the 2008 Hancock County New Home Tour. Besides building custom and semi-custom move-up and empty-nester homes, the Noblesville-based company also does remodeling projects and additions and has developed several maintenance-free condominium projects.

Bedrock Builders' three fully-furnished and staffed model homes and its color selection and design center give clients a chance to see the products and finishes firsthand, all in one convenient location. "While we have a lot of clients who want a custom home built from scratch, many of our clients want a high-quality home without the challenge of making all selections from the ground up and the time commitment it entails," says Dan, who serves as First Vice President for BAGI's Board of Directors. "This allows them the ability to streamline the process."
